Optional Extras

Traces – Molybdenum, No of Samples @ \$20.00 Total \$.....
Selenium & Cobalt

Total ex GST \$.....

10% GST \$.....

Total Inc GST \$.....

If you require result interpretation and recommendations, (the cost for which is included above) please complete a Paddock Information Sheet for each sample enclosed.

Please fill the soil sample bag and the programming and client sample bags so that they are comfortably full but not over full. The required amount of soil for the lab is approximately 250 gm or 1 cup. Please do not handle the soil samples with bare hands.

Place the filled soil sample bags and programming sample bags inside the soil sampling kit bags along with the Paddock Information Sheets and this Service Request Form and return to BioAg as per the address below via an appropriate sized post pack. Please ensure that each sample bag is clearly and fully identified with your name (trading) and paddock name or identifying number.
